

THE FREEDOM
TO COMMUNICATE
INTUITIVELY

PANASONIC IP SOFTPHONE

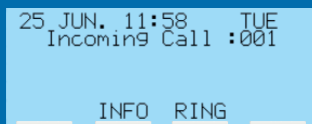

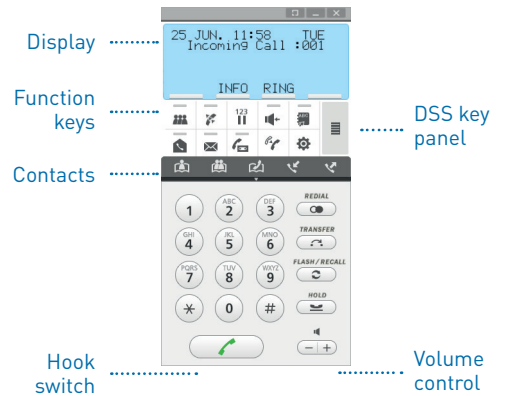

The Panasonic IP Softphone has been updated with a completely new graphical interface but still provides consistent features and functions to complement the latest Panasonic handsets.

Improved menu navigation and button layout make the new IP Softphone even more intuitive. With clipboard dialling and conversation recording as standard, the new IP Softphone offers excellent value.

System requirements

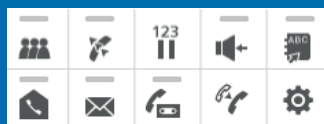

Supported communication systems:
KX-NCP, KX-TDE, KX-NS, KX-NSX & KX-NSV Series

Supported Operating Systems:
Windows® 7, Windows 8.1, Windows 10

DISPLAY

The 6-line display dynamically changes to present vital call information, including caller name, number and target destination. Context sensitive soft keys are also presented when available along with live call status, time and date and menu options.

FUNCTION KEYS

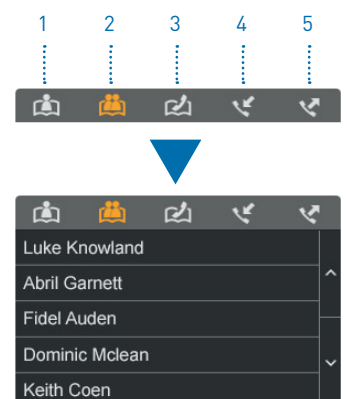

Allows the users to access frequently used functions such as conference, call forwarding, voice recording, messages and option settings.

CONTACTS

Available contact lists:

- [1] Personal Directory
- [2] System Directory
- [3] Extension Directory
- [4] Incoming Call Log
- [5] Outgoing Call Log

Up to 5 contacts are displayed at a time. Search each list using scroll buttons. Each list is presented in alphabetical order and will loop back to the beginning in either direction.

HOOK SWITCH

Answer or end call.
Indication changes dynamically.

VOLUME CONTROL

Control ringer volume when idle
or speaker volume during calls.

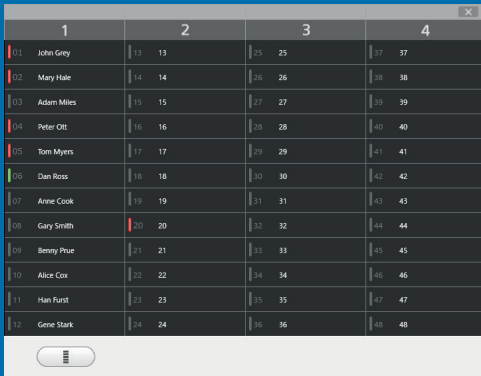

DSS KEY PANEL

Click to switch DSS panel display mode: Hidden (default),
Compact or Full Display.

Compact mode provides 4 pages – select the active page using
the page number icon.

Switch to Full Display mode for all 48 function keys to be active.

OPERATION AVAILABILITY

The following operations are only available with the handset display mode.

- Handset programming using PROG soft key.
- The Feature Access sub menu under the soft button menu. With new Softphone mode, specific features can be stored into flexible buttons on the DSS key panel.
- Deleting the entries in incoming/outgoing call logs.
- Creating or editing personal directory entries.

ENHANCED FEATURES INCLUDED AS STANDARD

Conversation recording and clipboard are now available as standard.
No additional license is required.

MEDIA RELAY GATEWAY

The IP Softphone now supports Media Relay Gateway with the KX-NS series systems, providing home or remote-worker users with easy setup and operation.

No additional equipment or activation keys are required.

HEADSET SUPPORT

The updated IP Softphone supports headset button operations, such as answering a call, ending a call and mute/unmute, for USB headsets, including Bluetooth headsets with a USB dongle.

Supported headset manufacturers

Plantronics® • Jabra® • Sennheiser

Supported headset button operations

Answer a call • End a call • Mute / unmute
